PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience across enterprise backend development, system integrations, production operations and platform administration. Hands-on experience with Java, Spring Boot, Oracle, REST APIs, LDAP authentication, OTP workflows, Oracle WebLogic and Atlassian ecosystem administration. Experienced in balancing software development, CI/CD, release management and production support responsibilities within Agile delivery environments. Currently developing LifeOS, an AI-powered personal operating system using React, TypeScript and modern engineering practices.

CORE SKILLS

Languages Backend Engineering

Frontend Engineering Databases Enterprise Platforms

Servers & Infrastructure

CI/CD & Delivery

Testing

Java • TypeScript • JavaScript • SQL
Spring Boot • Spring MVC • Hibernate/JPA • REST APIs • LDAP Authentication • OTP Workflows • Maven • Gradle
React • Angular • HTML5 • CSS3
Oracle • PostgreSQL • MySQL
Jira • Confluence • Bitbucket • Bamboo • ScriptRunner • Atlassian SDK
Oracle WebLogic • Apache Tomcat • Linux • Docker • Glowroot • Hazelcast
Bamboo Build Plans • Deployment Projects • Build Agents • Release Management • Git • SVN
JUnit • Mockito • Vitest • React Testing Library

PROFESSIONAL EXPERIENCE

OYAK Digital

2022 - 2026

Senior Software Engineer

- Developed and maintained backend services for OYAK Mobile Backend using Java, Spring Boot (2.x) and Oracle Database.
- Contributed to Online Member Services and internal enterprise backend layers involving authentication, integrations and business logic.
- Designed and implemented RESTful APIs integrating internal enterprise systems and third-party services.
- Implemented authentication workflows involving LDAP authentication, OTP verification, SMS providers and email notification services.
- Investigated and resolved production incidents to restore service availability and minimize operational disruption.
- Managed Oracle WebLogic production deployments, rollback procedures, service monitoring, log analysis and routine operational maintenance.
- Administered Jira, Confluence, Bitbucket and Bamboo, covering monitoring, storage management, maintenance and troubleshooting.
- Configured and maintained Bamboo build plans, deployment projects and build agents to support CI/CD, release management and software delivery.
- Balanced backend development, platform administration and production support within Agile delivery cycles; worked in a 10-member Scrum team and performed peer code reviews.

Key Highlights

Enterprise Mobile Backend • REST API Development • Enterprise Integrations • LDAP / OTP / SMS / Email • Oracle WebLogic • Production Support • Atlassian Administration • Bamboo / CI/CD

PROFESSIONAL EXPERIENCE

Köstebek Technology

2017 - 2022

Software Engineer

- Provided enterprise consulting, installation, configuration and operational support for Atlassian products including Jira, Confluence, Bitbucket and Bamboo.
- Worked directly with enterprise customers remotely and on-site to analyze requirements, resolve issues and deliver tailored software solutions.
- Installed, upgraded and maintained Atlassian environments, including plugin installations, SSL configuration, LDAP integrations, backups and routine maintenance.
- Troubleshoot production issues through log analysis, system diagnostics and remote technical support.
- Configured and maintained Bamboo build plans, deployment projects and build agents to support CI/CD and release processes.
- Implemented features, enhancements and bug fixes for commercial Atlassian Marketplace applications.
- Developed customer-specific customizations and enterprise software solutions using Java, Spring Framework and Atlassian SDK.
- Worked with Linux-based environments for application installation, upgrades, service management and troubleshooting.
- Participated in Agile development, peer code reviews and the full software development lifecycle from analysis to production releases.

Key Highlights

Enterprise Atlassian Consulting • Enterprise Customer Support • Customer-specific Solutions • Marketplace Development • Bamboo Administration • CI/CD & Release Management • Linux Environments

PERSONAL PROJECT

LifeOS

2026 - Present

Founder & Software Engineer

- Building a portfolio-grade personal productivity platform for productivity, health, finance, career management and personal project tracking.
- Managing the project with GitHub Projects, sprint planning, backlog tracking and issue-based development.
- Developing the frontend with React, TypeScript and Vite using a modern component-based architecture.
- Setting up engineering practices including ESLint, Prettier, automated tests and GitHub Actions.

Key Highlights

React 19 • TypeScript • Vite • Vitest • React Testing Library • GitHub Actions • ESLint • Prettier • GitHub Projects

EARLY CAREER

Earlier Software Engineering Experience | 2012 - 2017

Built a strong full-stack software development foundation through web-based business applications, CMS solutions, e-commerce platforms, inventory management systems, custom admin panels and corporate websites.

E-Kalite Software • Artifeks Media • Uskur Software • Vehbi Yılmaz Engineering

Representative work: inventory management systems, e-commerce platforms, corporate web applications, custom CMS solutions and admin panels.

Technologies: PHP • Java • JavaScript • jQuery • HTML • CSS • MySQL • CakePHP • CodeIgniter • Bootstrap
